The Dojo

Learn the terminal, C++ and Python from zero.
Works offline. You only need `python3`.

1 Start

```
tar -xzf the-dojo.tar.gz
cd the-dojo
./run.sh
```

Open the address it prints. Press **Create account**, then **Log in**.

Windows: double-click **The Dojo** on the desktop.

2 Solve a challenge

1. Press **Read lesson**, then **Start**.
2. A terminal opens in your folder, `~/dojo/<your name>`.
3. Do the tasks in `README.md`.
4. Run `./check`. Fix it until it prints `CHECK_OK`.
5. Press **Mark as done**.

3 Stuck?

1. Read the lesson again.
2. `./check` tells you which task is wrong.
3. Press **Hint**.

4 Belts

Finish one belt to open the next.

- ⚪ White · terminal
- 🟡 Yellow · Linux
- 🟠 Orange · C++
- 🔵 Blue · Python

5 vim

`vim file.py`	open a file
`i` / `Esc`	start typing / stop typing
`:wq`	save and quit
`:q!`	quit, do not save
`u`	undo

6 Good to know

Lost your terminal?	`cd ~/dojo/<your name>`
Progress	Saves by itself.
Take your work home	**Save to a file**
Stop The Dojo	**Ctrl-C** in its window

Admin: see `README.md` and `docs/WSL.md`
